

WORKSHEET OUTPOST | Kindergarten Math

Explain a measurement comparison

OW-K-110 | Five questions

Success criteria
I can compare two objects and tell how their measurements differ.

Name: _____ Date: _____

Read each problem or listen as someone reads it. Show your thinking with objects, pictures, words, or numbers.

1. Ribbons start at different places. How can you compare their lengths fairly?

2. A jug looks tall. Does that prove it holds more than a wide jar? Explain.

3. Is a big empty box always heavier than a small rock? How could you check?

4. Draw two towers. Circle the taller one. Explain how you compared their heights.

5. Write a problem like question 1 with new numbers or objects. Solve it and show your work.

You can point, speak, draw, or write. Adults can note any help they give.
